

Responsible Person & Registrant Course Syllabus

Course Overview

This course is aimed at personnel who take responsibility for the management of radiation sources (xray devices, radioactive material) on behalf of their organisation.

This course informs course participants about their responsibilities relating to radiation management as required by the legislative framework including registration & licensing; management plans; auditing & compliance responsibilities; and incident response.

This course contains foundation radiation safety information, whilst avoiding in-depth math's & physics concepts.

Course Structure

- An Introduction to Radiation
- Radiation in Perspective
- Radiation Dose, Measurement and Protection Principles
- Regulatory Considerations and Responsibilities
- Radiation Devices (Company Specific)
- Procedures: Radiation Management Systems; Security; Emergency Response

About this Course

It is a requirement under the Radiation Safety Act 1975 that radiation sources are registered by a 'Responsible Person'. The ARPANSA National Directory for Radiation Protection defines the 'Responsible Person' as the person:

- having overall management responsibility including responsibility for the security and maintenance of the source, apparatus, installation or facility
- having overall control over who may use the source or apparatus, installation or facility; and
- in whose name the source, apparatus, installation or facility, would be registered if this is required.

Assessment

This course has no assessment requirements or licensing outcomes.

Certification

A Statement of Attainment is issued upon successful completion of this course.

Why choose Radiation Services WA?

We have proven know-how and reliability, with a reputation for prompt and professional service throughout Australia - our consultants have extensive experience having worked in regulatory and industrial radiation management capacities.

Our personnel have been commended for their ability to talk about radiation safety in simple terms and to put the risks into real-world perspective.

We are here to help and no matter what you require in the field of radiation management, we're able to deliver a timely and customised solution to suit your needs.
